EXECUTIVE SUMMARY

Aspiring full stack developer skilled in MERN, Python, and Java stacks, with a strong foundation in data structures and algorithms using Python. Passionate about learning new technologies and solving real-world problems through AI/ML. Eager to apply my skills in a dynamic environment while continuously growing.

PROJECTS

JOB PORTAL | MERN STACK

- 2025
- Engineered a job portal supporting **500+ users**, featuring authentication, job postings, and user management with MongoDB, Express.js, React.js, and Node.js.
 - Optimized backend operations, reducing job retrieval time by **40%** through efficient indexing and API caching.

ART GALLERY | JAVA FULL STACK (SPRING BOOT, HIBERNATE)

- 2024
- Developed a full-stack web app managing **1,000+ art pieces**, artists, and customers using Spring Boot and Hibernate.
 - Enhanced database efficiency by **30%** through query optimization and caching techniques.

PLACE IDENTIFICATION AND CLASSIFICATION | DEEP LEARNING (PYTHON, PYTORCH, KERAS)

- 2023
- Built a deep learning model using CNNs to classify and identify places from the images of Kaggle datasets with high accuracy.
 - Achieved over **95% accuracy** on the test set, enabling real-time place recognition in diverse environments.

ACHIEVEMENTS

- Secured **runner-up** in the **Web Development Hackathon 2022**, competing against **100+ teams**.
- Achieved **2nd place** in the **KL University DSA Coding Competition**, outperforming **500+ participants**.
- Won **Powerlifting Champion** title in the **District and State Championship**.
